Our certificates

The product is available in bags or bulk packaging, tailored to the customer's needs.

Sunflower lecithin is a natural emulsifier obtained from sunflower seeds, purified and processed into a free-flowing powder. It has a color from light yellow to light brown, a fine and free-flowing structure and a typical, neutral taste and odor, without foreign flavors.

The product is distinguished by its high phospholipid content, good solubility and emulsifying and stabilizing properties. It does not contain GMOs and meets food safety requirements, being widely used in various industries.
